

# Information on Open Access for cycling advocacy groups

Laura J. Wilkinson | November 2015

Open Access means unrestricted online access to scholarly research, allowing anyone with an internet connection to read, download, and share journal articles and other academic documents and media.

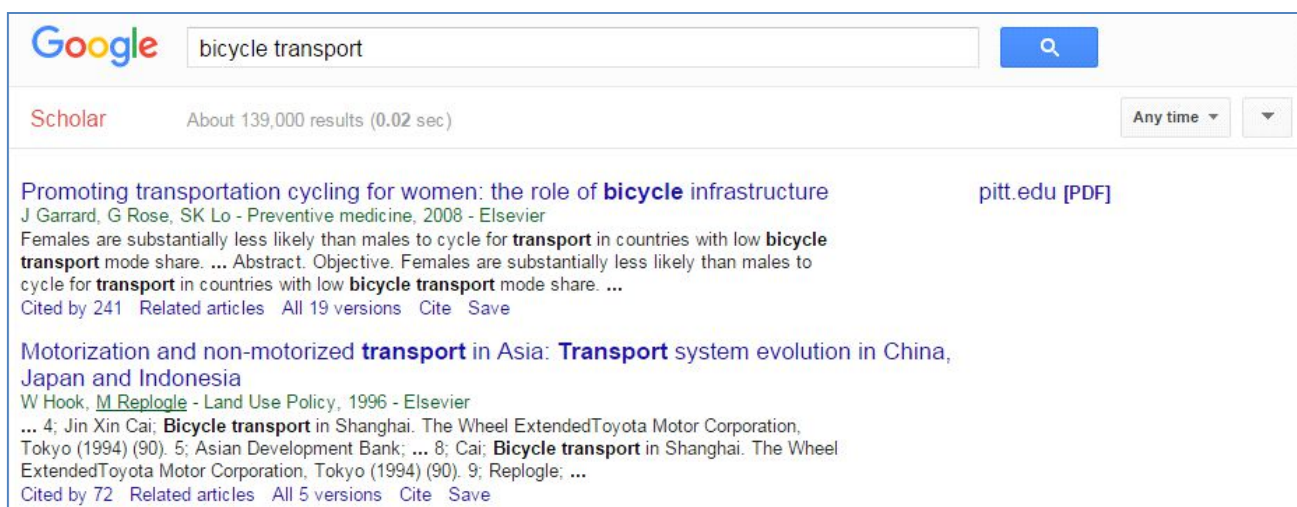

Open Access is important because it allows access to scholarly research to people beyond academia, who were previously prevented from reading and using journal articles by the high cost of subscriptions. For more about Open Access in the university context, please see my blogpost “An introduction to Open Access for academics” <https://darkarchive.wordpress.com/2014/03/19/an-introduction-to-open-access-for-academics>

Open Access is not yet universal, so much scholarly publishing is still behind a paywall, and requires a payment or institutional login to access it. However, the amount of material openly available is increasing all the time, and here is how you can find and read it.

1. Start from Google Scholar <http://scholar.google.co.uk>. Google Scholar provides a simple way to search for scholarly literature (not just open access material) from a large number of databases.

2. Enter some keywords to begin your search

3. Look out for a link to the full-text article on the right e.g. “pitt.edu [PDF]” and follow the link to read it.

- If you are a current member of a university, go to Google Scholar > Settings > Library links and search for your institution. Save this setting, and links will now appear next to articles for which you university has access through a library subscription – just follow the link and log in to read.

What to do if there is no link to the document

- If there is no link, it means that you still need a subscription to read the article. You could try searching for the article title using any search engine, to see if the article is available anywhere else on the web. Use quotes to search for the title phrase, e.g. “Global sport mega-events and the politics of mobility: the case of the London 2012 Olympics”

### Global sport mega-events and the politics of mobility: the case of the London 2012 Olympics

R Giulianotti, G Armstrong, G Hales... - The British journal of ..., 2015 - Wiley Online Library

Abstract This paper examines the politics of mobility which surrounded the London 2012 Olympics. We provide a critical discussion of the mobility conflicts, problems and criticisms which emerged from our research with local people in the Stratford and wider Newham ...

- Another approach you can try is to contact the article’s author directly to ask if they would be willing to send you a copy. If you are seeking this information to directly support the work of your advocacy group, and have no university affiliation through which you could access the text, make this clear in your message.

- c) Most UK universities allow guest access to their libraries for members of the public with a legitimate research interest (this also applies to the six libraries of legal deposit: the British Library, Bodleian Libraries of the University of Oxford, Cambridge University Library, National Library of Scotland, Library of Trinity College Dublin, and the National Library of Wales). A modest fee may apply. This access will often be limited to their print journals, and not online access (this is because of the licences they must sign for access to electronic journals) but you may still find this useful. Check the website of your local university library for more information on walk-in access. Mention that you seek this access because of your advocacy work.
- d) If you are a graduate of a UK university, find out from the website of your alma mater if you are entitled to any alumni access to electronic journals.

#### More Open Access resources

- DOAJ (Directory of Open Access Journals) - online directory that indexes and provides access to quality open access, peer-reviewed journals <https://doaj.org>
- CORE (COncnecting REpositories) - site which aggregates open access research outputs from repositories and journals and make them available to the public <http://core.ac.uk/>
